

Hithermoor Soil Treatment Facility

Our contaminated soil recycling facility can accept a very broad range contaminated non-hazardous and hazardous soils from construction and industrial sources such as house building, demolition and general land clearance. The service is cost effective, fully permitted and approved by the Environment Agency.

We offer:

- 48 hour turnaround for new enquiries
- Quick decision on material acceptance
- Advise and help with form completion
- Full compliance and traceability

Cost Effective:

- Attractive pricing for large volumes
- No landfill tax is applicable
- No Leachate Waste Acceptance Criteria (WAC) testing required

We are conveniently located at junction 14 of the M25 next to Heathrow Airport!

We can accept selected WAC failures from conventional landfill sites and offer full compliance and tractability for all soils processed, eliminating future liability. Certification of treatment can be issued if required giving peace of mind to you and your customer.

Suitable material types include:

Pile arisings

River and lagoon dredging's

Soils and made ground

Treatment plant residues

Tunnel shaft arising's

Railway ballast

Typical contaminants treated:

Petrol

Diesel fuel

Gas oil

Heating oils

Kerosene

PAH's

Lubricating oils

Used and waste oils

Hydro carbons

(Acceptance in all cases depends on concentration)
