

THE BRETT GROUP. BUILDING STRONG FOUNDATIONS

The Brett Group is one of the largest independent groups of construction and building materials companies in the UK.

Since the company was founded in 1909 we have grown substantially, consolidating our UK presence with businesses in the USA and Channel Islands and continually building on our reputation for innovation, quality products and personal service.

Today, Brett businesses operate across diverse construction sectors: Brett Concrete supplying ready-mixed concrete, Brett Aggregates providing construction materials and aggregates, Brett Construction

handling building and civil engineering projects, and Brett Landscaping and Building Products offering garden landscaping and driveway products and specialized aggregates to consumers and trade customers. For more information visit our website at www.brett.co.uk

Each company shares the same Group values – a commitment to outstanding service, engaging with customers and remaining independent to reinforce the trust that the name Brett inspires.

Just as they shaped our past, these core principles drive our future. As a Group, we take a long term, sustainable view, taking every opportunity to set new benchmarks, invest for growth and continuously improve the services we offer.

THE NEW FACE OF BRETT

Launched in 2005 our new Brett Group identity is part of this vision. Introduced in response to customer and stakeholder feedback, it's fresh and distinctive and it represents the whole Brett Group. The 'built on relationships' belief we adopt captures what's at the heart of our attitude and personalised approach to doing business.

Yet while the Brett image has changed to reflect our growth and success, the Brett Group still holds true to the principles that made it unique in 1909 – an unwavering desire to constantly exceed expectations and be the company of choice for businesses and consumers everywhere.

CONCRETE COMMITMENT

Brett Concrete is part of the Brett Group, an independent business which specialises in the supply of ready-mixed concrete and floor screed to the construction industry.

Our unrivalled expertise in this sector has helped us to develop a product and services which are second to none.

We build long term relationships with our customers and understand both their technical requirements and the commercial imperatives which drive their success.

The Brett Group has built its reputation on delivering our promises and continuously improving what we do. This philosophy of corporate accountability, environmental responsibility and professional integrity has remained the same for almost a century – and is still the cornerstone of the Group's business strategy.

We believe that ready-mixed concrete is a key component in the regeneration of the UK's

public services and infrastructure – hospitals, roads, schools – and that it has a significant role to play in terms of environmental sustainability. Ready-mixed concrete is one of the world's most versatile building materials, it's recyclable and surprisingly energy-efficient, offering far more lifetime sustainability than many other alternative construction materials.

QUALITY AND ACCOUNTABILITY

All Brett Concrete products are produced under a quality management system. Our ready-mixed concrete is accredited to the Quality Scheme for Ready Mixed Concrete (QSRMC), a specialist body which provides product conformity certification for ready-mixed concrete supplied in the UK to ISO 9001 standards. Each of Brett Concrete's production facilities also employ the latest technology to ensure that strict statutory requirements are met at all times.

CUSTOMER SERVICE FIRST

With a network of quality controlled plant operations across London and the South East, Brett Concrete is now the largest independent operator in the UK.

Led by a dedicated hands-on team of professional managers, the company prides itself on its ability to respond quickly and flexibly to individual customer requirements. We offer an exceptional level of personal service and commitment.

SERVING ALL SECTORS

With a combined resource of 22 operational plants across the South East, a fleet of truck mixers and annual production capacity in excess of 500,000 m³, Brett Concrete can supply every sector of the construction industry – from the largest civil engineering contractor to the smallest DIY project. In addition, Brett Concrete supplies customers with floor screed as well as operating a specialist minimix service for domestic customers who require smaller loads of concrete.

DELIVERING THE GOODS

Our high quality products and guaranteed service delivery have helped us to win many prestigious civil engineering and construction projects over recent years, including the Docklands Light Railway Contract (Section 2), London City Airport, Bluewater Park and three contracts supplying the Channel Tunnel Rail Link.

These projects have enabled Brett Concrete to develop specialist expertise in designing and operating bespoke site plants. Working in close partnership with contractors and clients, we are able to add value to large-scale projects, bringing expertise and experience to deliver the best solution.
