

BRETT GROUP TRANSPORT POLICY

The Brett Group will act to reduce the adverse social and environmental impacts of transport associated with the delivery of our product to customers.

In order to achieve this we will:

- minimise transport of our products through effective route planning and wherever possible reduce unladen road mileage
- monitor and review distances travelled and types of transport used to deliver constituent materials and deliver products
- promote alternative delivery methods such as barge or rail wherever practicable and viable
- ensure delivery drivers have undertaken training in safe, fuel efficient and considerate driving
- minimise neighbourhood impacts by ensuring that any restrictions in vehicle movements are adhered to
- minimise impact by ensuring products are transferred in appropriate vehicles suitably packaged and secured
- consider the use of alternative fuels, fuel efficiency and safety standards when purchasing new equipment or vehicles
- dispose of vehicles responsibly at end of life.
