How to buy.

To ensure a seamless quality service, we only trust our products to be supplied through a national network of builders' merchants and accredited Brett Approved Installers. With access to the full portfolio of our products, they can help you to make an informed product selection.

You can also purchase a selection of our products direct from our Paving Outlet at www.clearancepaving.co.uk.

Display stands are available at your local stockist to showcase our product, although we recommend contacting your local branch before visiting to ensure your product is on display. If the product isn't on show, your local Brett stockist can organise a sample to be ordered. For more information, see page 102.

GET INSPIRED Visit the 'Inspirations' section on our website to view a portfolio of Brett Approved Installer driveway and garden installations.

Gardens

Your garden is a place for relaxation, to entertain, for the children to play, to escape the everyday. Landscaping your garden can mean many things to different people, from a tranquil lush green haven, to a more contemporary affair with structural planting gravels and linear styling.

Whatever your taste, Brett Landscaping can create you wildest ideas with wonderful products to complement the colours, textures and style of your garden foliage and your home. Even the smallest areas can be enhanced by our landscaping products, to provide a sense of clear space, drawing focus to specific features, or to provide colour and textural contrast.

Why use a **Brett Approved Installer (BAI)**

Providing you with that all-important peace of mind, our nationwide network of Brett Approved Installers (BAIs) is experienced in the craft of installing our products, and their workmanship is rigorously assessed and monitored, so you know your Brett driveway or patio will be installed to the highest standards.

All Brett Approved Installers have access to the latest technical and support services offered by Brett and so can easily help with product choice, design, logistics, British Standard queries and all other aspects of your project.

Installers

Expert Advice & **Design Consultation**

Quality Assessed 5 Year Installation Guarantee

10 Year Product Guarantee

How do I find a Brett Approved Installer near me?

Visit our 'Find an Installer' page at brettlandscaping.co.uk, enter your postcode and search within your local area for the BAI that best meets your project needs.

Our guarantee to you.

We always recommend choosing a Brett Approved Installer to carry out your installation. All our installers meet, or exceed, approved British Standards. When choosing a BAI you will receive the following product & installation guarantees to give you peace of mind.

Brett Approved Installer 5 Year Installation Guarantee

Only your Brett Approved Installer can provide you with a 5 year Installation Guarantee, so on completion of the project, you have the complete peace of mind. Your Approved Installer will also register your installation and product details directly onto our website - so you don't have to. All you need to do is verify the installation and products you chose are all as they should be.

Brett 10 Year Product Guarantee

Once your Brett Approved Installer has submitted your project information, we'll automatically send you a personalised email with log-in details to access the Guarantee Portal on our website. Simply verify the Brett products installed, privately rate the service you've received from your Brett Approved Installer and download your 10 Year Product Guarantee. Then, just sit back and enjoy your beautifully installed and fully guaranteed paving products from Brett Landscaping.

"Being a Brett approved installer gives the customer confidence in their choice of installer, an often overlooked and crucial part of the process. Being able to give our customers a 10-year product warranty is fantastic. And there is one less thing to worry about when you are in the process of designing a project."

Porcelain product selector.

Here's a colour guide to our porcelain paving ranges, from warm traditional hues to cool contemporary tones, we've got you covered.

There are a multitude of external porcelain and ceramic paving options now available in the market. But not everything's the same. Manufactured to a premium quality, our porcelain paving creates a stylish outside space that's an extension of your home.

Note: Swatches and illustrations are for visual reference only. Shade variation between products is to be expected as Brett's porcelain paving mimics the natural variances of stone. Please keep in mind, product colours in lifestyle photography may appear lighter or darker due to weather conditions

Eden Limestone Porcelain

Natural patterning and earthy colour tones for a timeless look.

The sophisticated, warm palette of Eden Limestone Porcelain will evoke the sun-drenched charm of the Mediterranean in your own garden, while still being subtle enough to work well with modern homes. With many homeowners looking to bring themselves closer to nature, Eden Limestone's natural qualities are an elegant solution. The 900 x 600 limestone in Cream porcelain has a subtle fine texture and a different origin of manufacture to the other colours.

Eden Sandstone Porcelain

Showcasing the timeless aesthetics of natural sandstone.

The warm and welcoming colour options are particularly well suited for creating an attractive, outdoor retreat - one which you won't want to keep hidden for long. Completing the look, the replication of the natural fissures and fossils within the variegated patterning are sure to uplift any garden space. Take advantage of mixed-size patio packs for a more traditional sandstone design, and introduce a truly romantic ambience to your garden.

Elegante Quartz Porcelain

Beautifully replicating the fine-veined effect of natural quartz.

The tasteful colour palette offered by Greige delivers a contemporary, understated look, able to uplift both modern and traditional homes with its premium qualities. Enhance your outdoor space by using Elegante Quartz as a stunning centerpiece. Alternatively, you could combine it with Aura cobbled paving for a perfect blend of contemporary and traditional styles.

The 900 x 600mm Antique Greige paving replicates the wonderful texture of quartz but with blended, bronzed tones, adding warmth and depth to your garden design.

Porcelain Paving

Sierra Stone Porcelain

Adds timeless elegance and character with a unique wavy edge design.

Bring timeless elegance to your garden with Sierra Stone Porcelain Paving. This 900x600x20mm porcelain slab features a distinct, distressed wavy edge detail, adding character and charm to any patio or outdoor setting. With its lightly textured, mottled surface, Sierra Stone Porcelain mimics the look of natural stone while providing the durability and low-maintenance benefits of porcelain.

The beige shade adds a welcoming, sunlit warmth, ideal for Mediterranean-inspired or rustic settings. The grey, on the other hand, offers a sleek, modern look that pairs beautifully with minimalist or contemporary designs. Whatever your style, Sierra Stone Porcelain Paving will elevate your outdoor space, creating a beautiful foundation for your garden retreat.

Riven Sandstone

Characterful colours to create the feel of an English country garden.

From the robust, autumnal shades of Fossil Mint and Sunrise, through to the cooler and more delicate tones of Forest Glen and Mountain Mist, these natural shades and patterns give your patio a unique look and feel. Varying piece to piece, the distinctive colours will take on a new charm in each individual setting, providing an almost antique aesthetic. The organic feel of Riven Sandstone is perfectly matched for individuals looking to achieve a setting that compliments the surrounding nature of their home, ticking all the boxes for a romantic English country garden.

Brett Landscaping X Ed Westwick.

"We got this property back in 2023 and went straight into full renovation, it needed a lot of love, so after doing the inside and making those decisions, it was time to switch our focus to the outside, and more specifically a back patio space that we could enjoy through our long summer days and even in winter. We scouted the internet and social media looking for the right thing and we came across Brett Landscaping and their Riven Sandstone in Fossil Mint was something we absolutely fell in love with, it offered this natural feel to things and we wanted something that was a little bit warmer".

- Ed Westwick, Actor and Musician.

Riven Sandstone Fossil Mint

A cost-effective yet visually appealing patio solution.

Whether you're envisioning a charming patio, winding pathways through your garden, or a series of elegant stepping stones, Chaucer paving provides a practical and versatile solution. Its narrow joints contribute to a more polished look, enhancing the overall aesthetics of your design. It's not just a paving solution; it's a canvas for your creative outdoor vision, allowing you to reclaim and redefine your outdoor space with style and functionality.

Drives

Drives

A driveway isn't simply a place for your car, it's the entrance to your home. It should be inviting, impactful, stylish and complementary to the aesthetics of your home. It can add value to your property, presenting that all-important kerb appeal.

Speaking of which, our kerbs are as attractive as the rest of our products. Simply, the Brett Landscaping driveway paving product range will help your home make an entrance. Our blocks come in different depths for different uses, but for driveways that are used to accommodate normal family cars, we'd recommend our 'light usage' range of 50mm and 60mm blocks. Speak to one of our Brett Approved Installers to ensure you have the correct product for your application.

Block paving

We've seen concrete block paving evolve over the years to become one of the UK's most popular landscaping solutions. Not only do they offer a robust, easy-to-install solution for your driveway paving, but come in an extensive range of colours, textures, and sizes that can be used to create any design, from contemporary to traditional.

Moreover, our blocks are designed for easy sectional removal, making repairs a breeze. We're committed to providing quality products that are easy to install, maintain, and repair.

Our concrete blocks are available as single size packs or TRIO Packs. A TRIO pack includes a combination of three sizes, which helps to create a more natural, varied pattern in your paving project.

Let us help you create the perfect entrance to your home with our top-quality block paving solutions.

(→) See **brettlandscaping.co.uk** for more information

Permeable paving

Helping towards the environmental stability of our planet is now more important than ever, and homeowners are taking the initiative, helping to combat flooding by reducing the amount of rainwater that runs from their gardens. Brett Landscaping offers a number of block products to help homeowners design a driveway that not only looks beautiful but helps manage surface water run-off. You can also add further interest by including our permeable gravels to your design, helping you meet the standards set by your Local Authority. As a homeowner, you now have a legal obligation to avoid surface water draining onto public highways from your property if the area exceeds the parameters allowed - specifically 5m². For further guidance, contact our customer service team who'll be delighted to help you.

Invicta block paving designed with AggTech® Technology.

Beautifully engineered, the Brett Invicta range uses a specially formulated surface layer, AggTech®, which has been developed to deliver high performance with a stunning, individual aesthetic.

Invicta has been developed to perform, using only the highestquality materials. You'll appreciate its distinctive sparkle, and the colours in its range have been specifically developed to complement each other, enabling a flexibility of design like nothing else.

To ensure its long-life structural performance, Invicta's AggTech® surface layer includes more cement, a higher concentration of pigment for richer, more defined tones, and a finer cut of premium, specialist aggregates. Formed in unison to the coarse, robust sub-layer which contains 15% recylced content, results in an extremely strong and secure bond for the life of the paving. Its surface layer is extremely hardwearing enabling it to shrug-off extreme weather and retain its vivid, brighter colours.

CHROMABLOCK TECHNOLOGY

ChromaBlock. Vibrant colours, Built to last.

Tough and beautiful for longer.

NEW SIGMA BLOCK PAVING CRAFTED WITH CHROMABLOCK (see page 67)

Transform your paving projects with ChromaBlock 's advanced technology, designed to enhance the depth and vibrancy of every block.

Designed to intensify every hue, ChromaBlock technology brings out rich, radiant colours that add life to any landscape. Engineered to give products long-lasting durability and visual impact, Chromablock technology gives our paving solutions more than just strength - they deliver style and sophistication. Whether it's a driveway, patio, or public space, ChromaBlock technology enhances block paving, delivering stunning, fade-resistant colours that make a lasting impression.

Invicta

An innovative masterpiece with its pioneering AggTech® surface layer.

Luxury

Crafted from premium aggregates, Invicta adds a unique sparkle and texture that sets it apart from ordinary concrete block paving products. With four complementary colours that effortlessly combine, your driveway will radiate an exceptional charm. The AggTech® surface layer not only offers superior durability but also ensures the highest level of slip resistance. Invicta comes in 6 versatile sizes, including a mixed size TRIO pack, in both 60mm and 80mm thicknesses. This versatility caters to a wide range of requirements and design preferences, it's no wonder it's our most popular driveway paving. With its remarkable qualities, Invicta promises to transform your property, giving your home a distinctive and stunning appearance.

Sigma

A contemporary block paving infused with ChromaBlock Technology.

Enhance your outdoor space with the contemporary elegance of Sigma Block Paving. Crafted with innovative ChromaBlock Technology, Sigma showcases rich, radiant colours that bring life to any landscape. This advanced technology accentuates Sigma's two unique shades - Urban Slate, a refined multi-tonal grey, and Urban Bronze, an eye-catching mix of greys and bronzes, offering a bold yet elegant colour palette that sets your outside space apart.

With sizes in 300x100x60mm and 600x200x80mm, Sigma is as versatile as it is stylish, suitable for creating intricate patterns or expansive, uniform surfaces that bring a modern edge to any home. Engineered for durability and exceptional visual impact, Sigma is built not just for strength but for style and sophistication, with fade-resistant colours that stand the test of time.

Transform your outdoor space with confidence.

Step into a world where your garden dreams come to life with our cutting-edge AR Visualiser, PaveScape! Transform your outdoor space with a simple snap and a click, as it allows you to envision our beautiful paving products into your outdoor environment.

How it works

Choosing the perfect paving has never been this exciting and effortless. Take a photo of your garden or driveway, and let the magic unfold as you explore the vast array of Brett products at your fingertips. PaveScape provides a seamless experience, allowing you to experiment with different styles, colours, and textures until you find the perfect match for your vision.

See it before you buy it!

Our PaveScape visualiser lets vou see it all before making any decisions. It's the ultimate tool to ensure that your outdoor space reflects your style and personality. Don't just imagine the possibilities- experience them with PaveScape.

Understanding **Paving Colours**

Colours in paving act differently for many reasons, not least for the many different textures and variations even within the same product. This is particularly significant with natural stone, which gives it its high-end quality look and feel. It's for these reasons that it's crucial to view actual samples, to provide a true impression of how our products look and how the finished design is likely to turn out.

Get samples to be colour-sure

You can quickly and easily obtain a product sample in your desired colour from either your Brett Approved Installer or your local Brett stockist.

Variations in colour are still possible across our product range due to a number of different factors:

- All concrete products are manufactured from a mixture of sand, cement, aggregate and pigment which can give variations in colour mix shades from batch-tobatch and site-to-site.
- Aesthetics account for a huge amount when making • a porcelain decision. A good porcelain supplier such as Brett will be able to tell you exactly how many different surface aesthetics there are in a specific product. Depending on the style, the greater the number of variations, the better the look. Ensure the more exotic patterns have plenty of alternatives.
- Natural stone products will vary in colour depending • upon where it's quarried and how the stone is processed prior to delivery.

These variations are impossible to prevent, but do bring character, style and individuality. When you choose a colour from a photograph, there are many factors that can change how the product looks; the time of day the photograph was actually taken, climatic conditions, and print limitations for example. These factors can affect how our product colours are viewed.

WHERE TO BUY & SUSTAINABILITY

WHY BECOME A BRETT APPROVED INSTALLER

> PRODUCT INFORMATION

GOOD TO KNOW

All our manufactured products are 100% recyclable and produced in the UK using fully sourced UK materials. Our flagship block paving range, Invicta features 15% recycled content within the backing mix, providing a more sustainable product without compromising on quality, performance or aesthetics.

Packaging & Delivery

We strive to eliminate plastic packaging from our products wherever possible. However, given our Health and Safety first culture, if packaging can not be eliminated due to a compromise in pack stability, we have reduced the non-essential plastic used, by implementing banding with 100% recycled content which is made from recycled PTFE bottles.

→ Visit brettlandscaping.co.uk/sustainability/ to learn more about our sustainability initiatives.

PAVESCAPE VISUALISER & UNDERSTANDING PAVING COLOURS

WHERE TO BUY & SUSTAINABILITY

WHY BECOME A BRETT APPROVED INSTALLER

> PRODUCT INFORMATION

Good to know

We're always looking for new ways to improve our products and services, so you'll always get the very best. From time to time, these improvements might alter our products' characteristics (weight, dimensions, shades, pack size etc.) and these changes may occur without notice.

For the latest product information including weights and dimensions, please get in touch to request the relevant technical data sheets or visit **brettlandscaping.co.uk**.

Although we've taken every care possible to make sure our colour swatches are accurate, differences may occur due to printing processes and variations between manufacturing batches. For a true representation we recommend that you request a product sample, allowing you to get hands-on with your choice of paving.

For all hard landscaping activities, we recommend the production of comprehensive risk assessment and method statements to ensure safe, sustainable and legal working practices are followed at all times.

Product applications and suitability

All of our products are manufactured in accordance with the relevant manufacturing standards. This ensures that they can be subject to design, installation and maintenance in accordance with the relevant standard from the BS 7533 suite of standards, as appropriate. An easy way to make sure your block paving is installed the correct way is to look for the small chamfer on the top of the block, this should be facing upwards when installing the block. The reverse side will be smooth without a chamfer.

Products featured in our 'Gardens & Drives' brochure are intended only for use in domestic applications.

Nominal Jointing: All dimensions quoted in Brett literature are nominal and are for guidance only. Actual sizes of individual units will vary, particularly on garden products. Most Sqm coverage figures assume a nominal 5mm - 10mm joint is used between all garden products. If you are having difficulty quantifying the product you require, please call our customer service team on 0345 60 80 570.

Specific information relating to product applications is available from **brettlandscaping.co.uk**, where you can access a wealth of information including our technical data sheets (TDS), CE Marking, UKCA Marking and/or Declaration of Performance (DoP) certificate as well as NBS clauses and BIM objects. We recommend any considerations relating to planning consents and permissions are satisfied.

To help you get the most from your project, the Brett team is on hand to suggest and advise on suitable product(s) for different applications and provide guidance for a successful installation.

Ordering

Selected your Brett product(s)? It's easy to place your order, just contact your nearest Brett stockist. You can find their details on **brettlandscaping.co.uk/** where-to-buy or you can contact us on **0345 60 80 570** and we'll point you in the right direction.

For the most consistent products possible, we recommend that:

- Where a stockist has provided samples, you use the same stockist for ordering the final product(s).
- All of your products are sourced from the same batch, or immediate adjacent batches.
- The total quantity required should be ordered and delivered at the same time to minimise the chance of product or batch variation.
- For larger orders a schedule will be required to successfully manage your orders.

In general, it's best to allow for 5% wastage. However, where a project or design requires larger amounts of cutting (for instance when creating a tight, twisting pathway rather than an open plaza area) this may increase the amount of product wastage.

When making any direct-to-site orders, please let us know of any constraints, hazards or special considerations that might need to be made prior to delivery. If you need any assistance calculating quantities, please call our Customer Services Team on **0345 60 80 570**.

Delivery and installation

We take every possible care with your order, but please check that it is in a satisfactory condition on delivery. In the unlikely event you have any issues with your order, please contact your stockist immediately with the product and batch code that are printed on the packaging and explain your concerns to them.

For the best colour and jointing-line consistency, we recommend:

 Mixing from at least three different packs as work progresses.

- Taking product 'slice-by-slice'/vertically from each pack wherever possible.
- Using string lines.

Following these guidelines will help distribute any minor variations over a larger area, giving you a visually consistent aesthetic over the entire project. However, please note that some variation can still occur between individual products – especially with multi-coloured and natural stone products. These features are to be expected and enhance the character and aesthetic of the completed installation.

Sealants: Before application of sealant, we suggest that you make sure you are satisfied with the cleanliness and aesthetics of the paving, so that unwanted dirt, detritus and any efflorescence do not become trapped once sealed. We recommend not sealing for a minimum of 12 months. Natural Stone can also show signs of efflorescence as a result of the cementitious bedding material. Natural stone can be sealed, however, we would recommend that all surfaces and edges are sealed prior to installation

If you have any concerns about the installation of our products, please contact our Customer Services Team on **0345 60 80 570** before work starts. Our team is here to help you get the best from your products. If you or your installer go ahead with installation despite your concern, this may be considered as acceptance of the product and unfortunately, may prejudice future responsibility for costs incurred stemming from remedial works.

Early life and maintenance

Once your paving has been installed, you may notice some changes to its appearance in the first days and weeks. These visual changes can be due to a number of reasons originating from the concrete and/or the manufacturing process or installation method.

Many of these changes will simply weather away, including:

- Efflorescence: The ongoing chemical reaction within the concrete which provides its strength can produce calcium carbonate (a white powdery residue) which may appear on the surface of products. This temporarily lightens the product but will typically weather away without reoccurrence.
- Porosity: Concrete continues to cure for many years after manufacture. Whilst this happens and usually during it's initial life, a level of porosity may exist where some product retains water, giving a damp appearance. This will diminish as the concrete continues to harden as the product dries out.

PAVESCAPE VISUALISER & UNDERSTANDING PAVING COLOURS

WHERE TO BUY & SUSTAINABILITY

WHY BECOME A BRETT APPROVED INSTALLER

> PRODUCT INFORMATION

GOOD TO KNOW

 Aged and distressed products: For certain products, we distress the edges to offer an aged appearance and enhance the character of the paving.

A dusty residue can be left on the blocks. This will weather away.

- Differential curing: Dark patches occasionally appear on the surface of garden products. This may be differential curing and is caused by varying moisture levels within the flag drying at different rates. Like efflorescence, given time and the natural weathering process, these patches will become less visible.
- Aggregate contaminants: Very rarely concrete may contain Iron Pyrites and/or Lignite.
 These are both the result of naturally occurring constituents within the product raw materials which may result in localised discolouration of the surface of an individual unit.
 The phenomenon will not normally affect the performance of the product.

In the unlikely event of any other concerns, please contact our Customer Services Team on **0345 60 80 570**.

All pavements should be cleaned and maintained periodically. How often this need to be carried out depends on the extent to which the product is exposed to soiling from the surrounding environment and what is deemed to be acceptable for the paving's final application.

For more information, please see the 'Essential Maintenance Guide' at **brettlandscaping.co.uk**.

Occasionally, sealants may be used to aid the longevity and appearance of the paving. If you are considering using a sealant, we recommend that you contact the manufacturer/supplier to fully understand their product.

We suggest care is taken when choosing these products and that you consider:

- That the slip/skid characteristics of the paving are not adversely affected.
- Whether this will result in a wet, glossy or matt finish.
- The need for any future re-application/maintenance.
- Any health and safety requirements for application and ventilation.

Swatches and illustrations are for visual reference only. Product colours in lifestyle photography may appear lighter or darker due to weather conditions.
